

Root for Earth with The Goddard School

Root for Earth, our annual celebration of environmental conservation, has a fresh spin for 2019! From April 1 to April 22, we will focus on figuring out different ways to reduce the number of single-use plastics we use in our Schools and in our homes.

On Monday, April 22 at 10:00 AM in each time zone, Goddard Schools will go dark by turning off all non-essential lighting for one hour. This signature initiative will save nearly four million watts of energy!

Stop by a Goddard School anytime during Root for Earth to help us preserve the planet for future generations of young learners!

Gardening with Your Preschooler

Have you found a summer camp program for your child yet? A high-quality summer camp often has an outdoor classroom or garden. Gardening allows your child to learn about biology through fun, hands-on experiences. Here are a few ways that you can continue the summer camp fun by [gardening with your child](#) at home.

Five Ways You Can Cut Down on Single-Use Plastics at Home

Single-use plastics are everywhere, and it can be challenging to avoid

[Energy Savings for a Healthier Earth](#)

As our children grow, it is important to teach them to conserve resources to keep our planet healthy for generations to come.

[Here are a few ways](#) to encourage eco-conscious behavior at home.

using them. Here are five simple ways you can [cut back on single-use plastics](#) at home.

Five Swaps You Can Make for Single-Use Plastics at School

Think globally and act locally by using these [five swaps for single-use plastics](#) at school.

Bento Box Mania

Bento boxes are a fun, creative and, most importantly, planet-friendly way to pack your child's lunch. [Click here](#) for different lunch options for your child's bento box!
